

Algebra 1
Unit 3
Lesson 1 Practice

Name _____
Date _____
Period _____

Use the equation $f(x) = \frac{5}{3}x - 1$ for questions 1 and 2.

1. What is the form of this linear equation?

2. Rewrite this equation in standard form.

Use the equation $y + 1 = -\frac{1}{3}(x - 3)$ for questions 3 and 4.

3. What is the form of this linear equation?

4. Rewrite this equation in standard form.

Use the equation $6x + 2y = -8$ for questions 5 and 6.

5. What is the form of this linear equation?

6. Rewrite this equation in slope-intercept form.

Use the equation $y + 3 = -2(x + 7)$ for questions 7 through 10.

7. What is the slope of the line?

8. Rewrite this equation in slope-intercept form.

9. Identify the y -intercept of the line.

10. Rewrite the equation in standard form.
