

Algebra 1

Unit 3

Lesson 1 Homework

Name_____

Date_____

Period_____

Use the equation $y = -\frac{1}{2}x - 3$ for questions 1 and 2.

1. What is the form of this linear equation?

2. Rewrite this equation in standard form.

Use the equation $y - 7 = \frac{2}{3}(x - 9)$ for questions 3 and 4.

3. What is the form of this linear equation?

4. Rewrite this equation in standard form.

Use the equation $3x + 5y = -2$ for questions 5 and 6.

5. What is the form of this linear equation?

6. Rewrite this equation in slope-intercept form.

Use the equation $y + 1 = 2(x + 4)$ for questions 7 through 10.

7. What is the slope of the line?

8. Rewrite this equation in slope-intercept form.

9. Identify the y -intercept of the line.

10. Rewrite the equation in standard form.
