

Algebra 1: Unit 3, Lesson 4

1. The graph of a linear relationship has an x – intercept of 1.4 and a y –intercept of 7.
What is the coordinate of the x –intercept?

2. A line passes through the points (0,15) and (2,9).

Complete the statement.

The slope of the line is _____ and the y –intercept is _____. The equation of the line in slope-intercept form is _____.

3. A line passes through the points (–4,2) and (8,11). What is the slope of the line?
