

Algebra 1: Unit 3, Lesson 8

1. A scatter plot with a line of fit is shown.

What kind of association is there between the x - values and the y - values?

2. The scatter plot displays the average finishing time for a high school cross country team in the women's 55-kilometer (km) race for the regional meet since 2001 as shown.

Complete the table to find the missing residual value.

x - value	Actual y - value	Predicted y - value	Residual Value
12	15.4	17.247	_____

3. What kind of association does the scatter plot show?
