

Algebra 1: Unit 4, Lesson 3

1. Find the slope of the function represented by the table of values below.

x	y
2	16
4	24
5	28
7	36
10	48

What is the slope of function?

2. What is the slope of the line $y - 3 = \frac{1}{3}x + 9$?

3. Complete the table below.

Point-Slope Form	Function Notation
$y - 2 = \frac{5}{4}(x - 4)$	$f(x) = \frac{5}{4}x - 3$
Slope-Intercept Form	_____
$y = \frac{5}{4}x - 3$	$5x - 4y = 12$
