

Algebra 1: Unit 4, Lesson 6

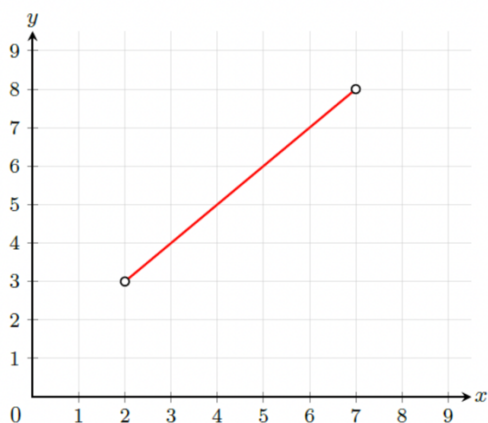

1. What is the value of $f(5)$, when $f(x) = 2x - 12$?

$f(5) = \underline{\hspace{2cm}}$

2. Nelson's birthday party will be at the skating rink. The cost for each person is \$20. The cost of the room for the party is \$80. The function $C(x) = 20x + 80$ models the total cost, C , with x people at the party.

What is the maximum number of people who can be at the party without exceeding the budget of \$400?

3. The graph of a $f(x)$ is shown.

What is the domain of $f(x)$?
