

Algebra 1: Unit 4, Lesson 7

1. The graph of function $f(x)$, is shown.

What is the solution to $f(x) = -2$?

$x =$ _____

2. The function, $h(x) = 2x - 5$, models the height, h , in feet, of a tree, where x is the age of the tree, in years. What is the height of the tree that is 17 years old?
3. Joan has \$65 to buy her friends a gift bag. The gift bags are \$5 each. The function, $f(x) = -5x + 65$, represents the amount of money Joan has left in her budget after purchasing x gift bags.

The solution for $f(x) = 0$ is $x =$ _____.
