

Algebra 1: Unit 4, Lesson 8

1. The graph of function $f(x)$, is shown.

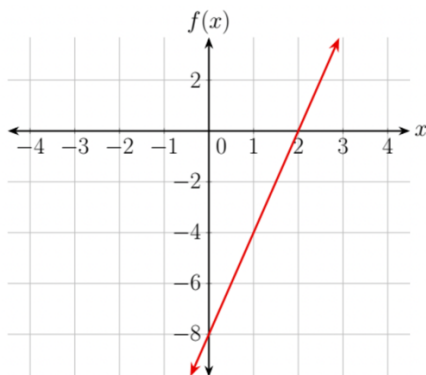

What is the slope of $f(x)$?

2. A linear function is shown.

$$y = -\frac{1}{4}x + 2$$

What is the x – intercept of the function?

3. The graph of function $f(x)$, is shown.

Complete the statement.

As the x –values increase, the y – values _____.
