

Algebra 1: Unit 4, Lesson 10

1. What is the equation of the line that is parallel to $y + 1 = -2(x - 5)$ and passes through the point, $(7, -2)$?

$$y + 2 = \underline{\hspace{2cm}}(x - 7)$$

2. What is the slope of the line that passes through the point, $(-1, 3)$ and $(2, 9)$?

3. What is the slope of a line that is parallel to $4x + y = 5$?
