

Algebra 1: Unit 4, Lesson 12

1. The line, $l_1: y = 5x + 3$, is _____ to $l_2: y = -\frac{1}{5}x + 3$.
2. A line that passes through the points, $(-3,1)$ and $(2,3)$, is _____ to the line that passes through the points, $(-5,-2)$ and $(5,2)$.
3. Determine whether the lines, $5x + 7y = 15$ and $-7x + 5y = -30$ are parallel, perpendicular, or neither.
