

Algebra 1: Unit 5, Lesson 6

1. Rewrite the equation, $4x - 5y = 20$, in slope-intercept form by isolating the variable, y . Write all fractions with no common factors.

2. The linear equations, $y = \frac{5}{3}x + 2$ and $y = \frac{5}{3}x - 7$ are _____ line.

3. The graph of the equation, $y = \frac{2}{3}x + 2$ is shown.

The coordinate $(9, \underline{\hspace{1cm}})$ lies on the line and is a solution to the equation that represents the line.
