

Algebra 1: Unit 6, Lesson 1

1. A number line is shown with a solution to an inequality.

Write an inequality that represents the solution shown on the number line.

2. Write the inequality for the phrase.

y is at least 8.

3. An inequality is shown.

$$-3.63z - 5.2453 \geq 15.7361$$

What is the solution to the inequality?
