Unit 6
Lesson 5 Practice

Name Answer Key
Date _____
Period _____

The linear inequality $6x - 3y < 18$ is written in standard form.

1. Complete the statement.

The boundary line of this inequality is

- ☒ dotted
☐ solid

because the points on the

boundary line are

- ☐ included from
☒ excluded from

the set.

2. Write the equation of the boundary line of this inequality in standard form.

Answers may vary. $6x - 3y = 18$

3. Graph the boundary line on the coordinate grid.

4. Explain how you will determine which side of the boundary line to shade.

Since the y -values must be greater than $2x - 6$, everything above the boundary line gets shaded since $y > 2x - 6$.

5. Shade the region on the graph that represents the solution set.

For each problem below, graph the given inequality.

6. $y \geq \frac{2}{3}x + 4$

7. $y < -3x - 6$

8. $x < 6$

9. $y \geq -5$

10. $y + 2 \geq 4(x - 1) \rightarrow y \geq 4x - 6$
