

6.7.5 Activity

Poster K

***Inequality From
Previous Poster:***

$$y \leq -\frac{3}{4}x - 1$$

Write an inequality in **slope-intercept form** with the solution set shown.

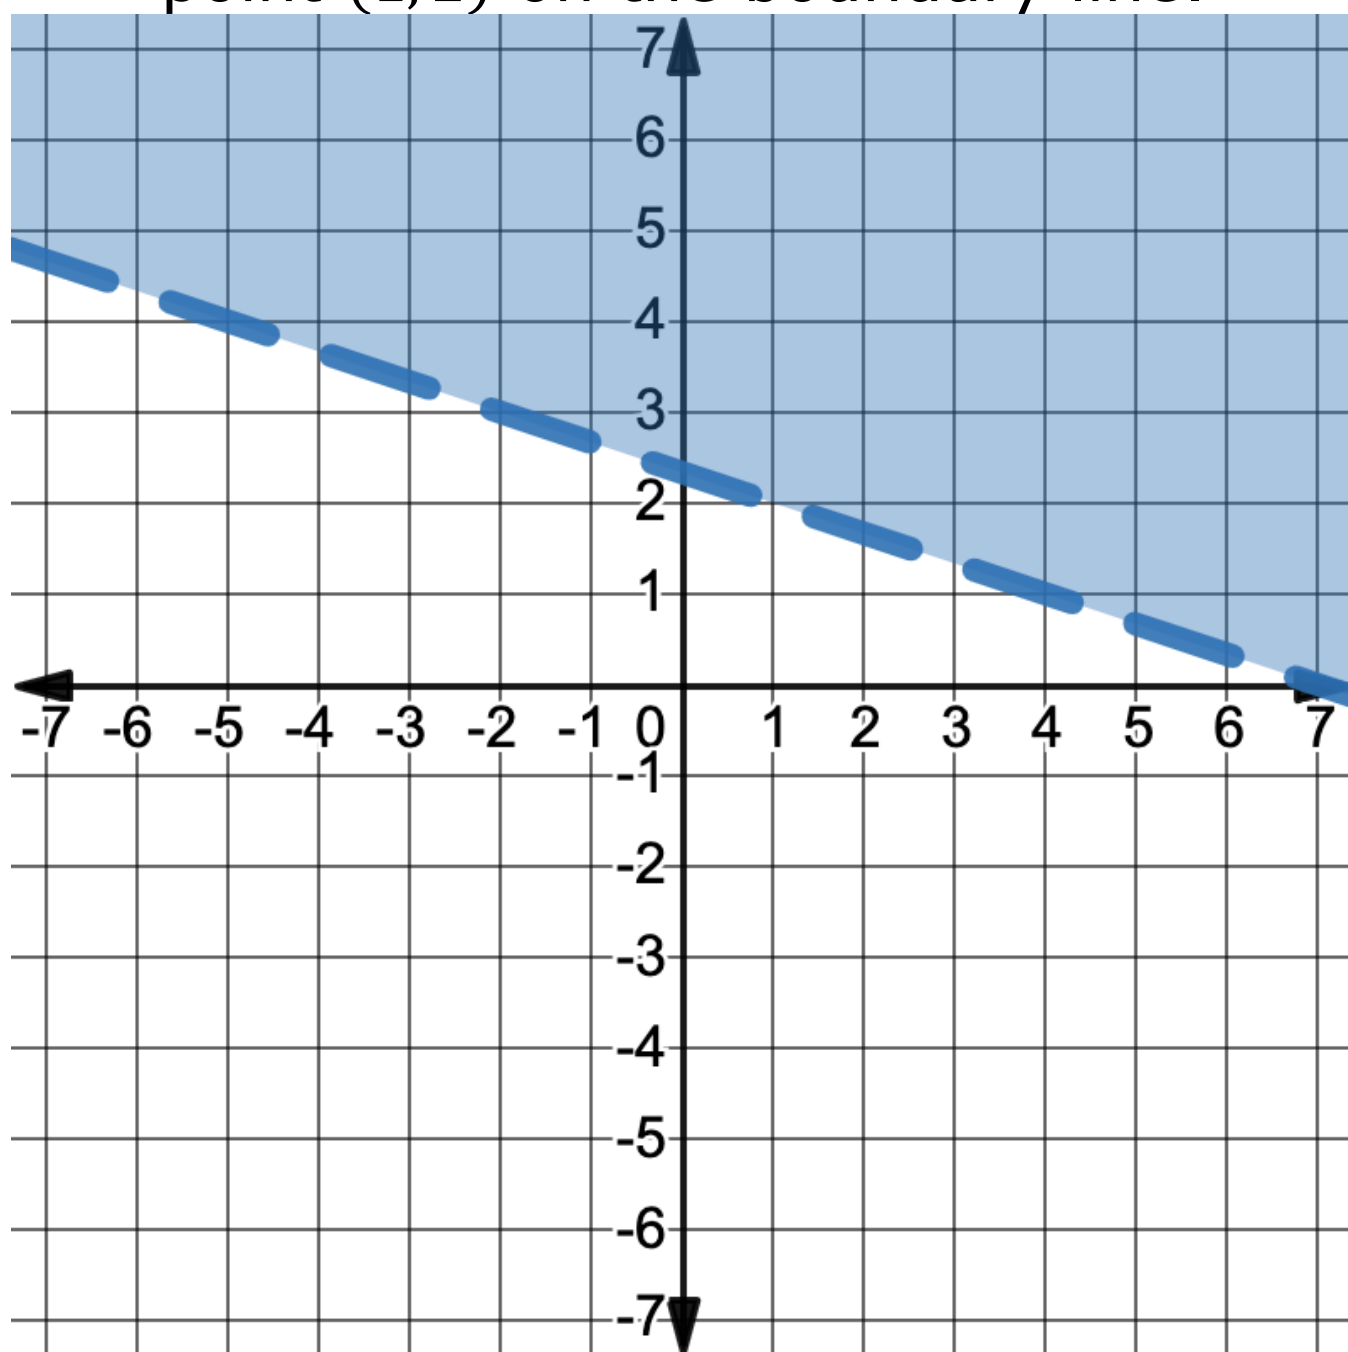

Poster F

Inequality From Previous Poster:

$$x > 3$$

Write an inequality in **point-slope form** with the solution set shown, using the point $(1, 2)$ on the boundary line.

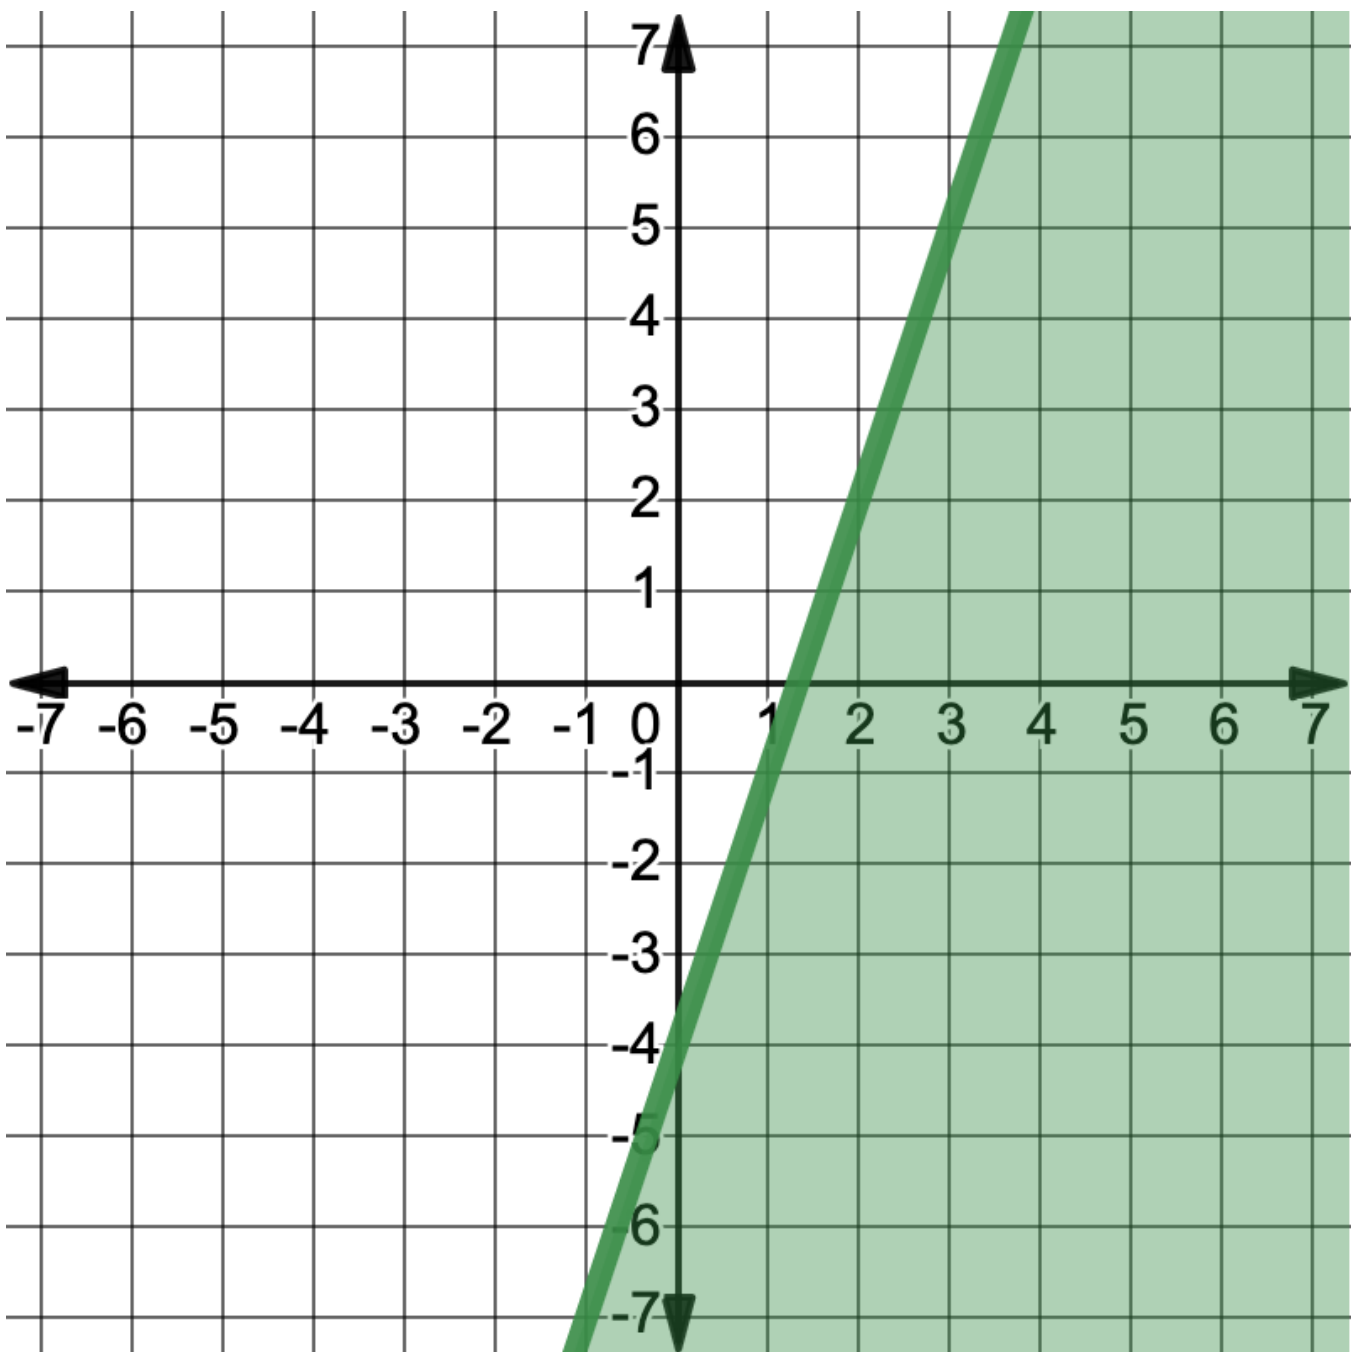

Poster B

***Inequality From
Previous Poster:***

$$3x + 4y \leq 20$$

Write an inequality in **slope-intercept form** with the solution set shown.

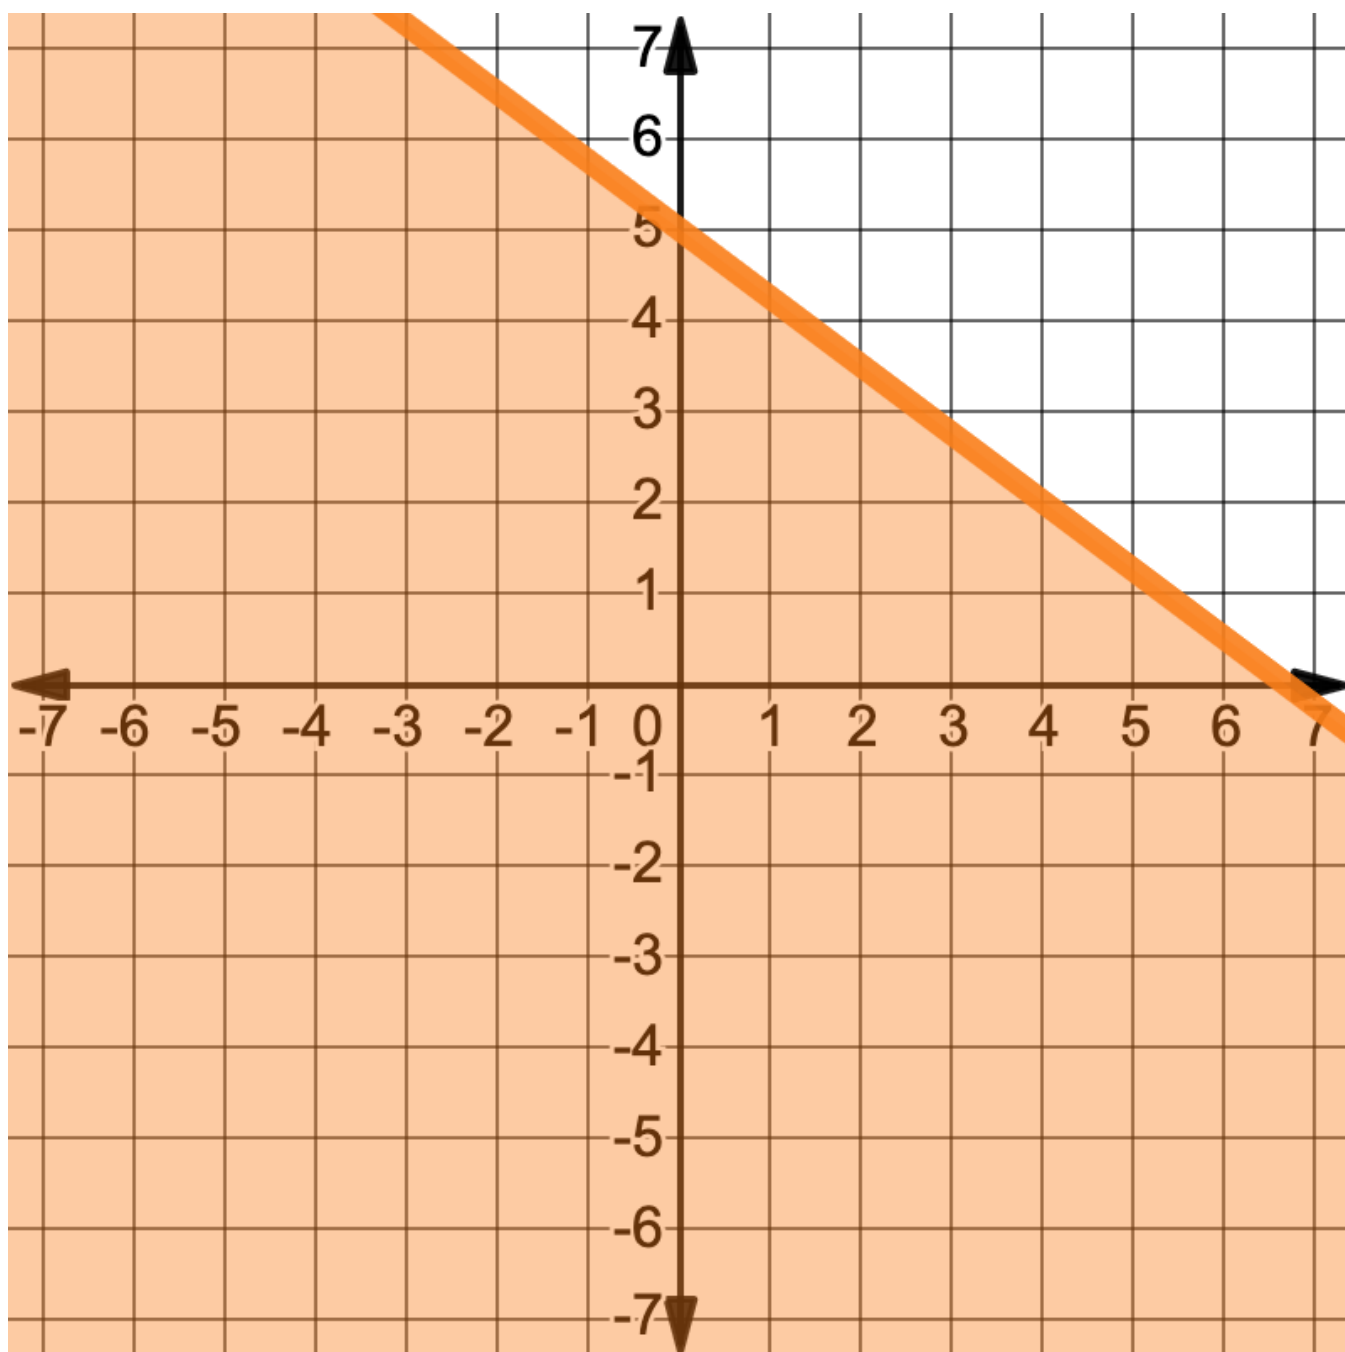

Poster R

***Inequality From
Previous Poster:***

$$y > 3$$

Write an inequality in **standard form** with the solution set shown.

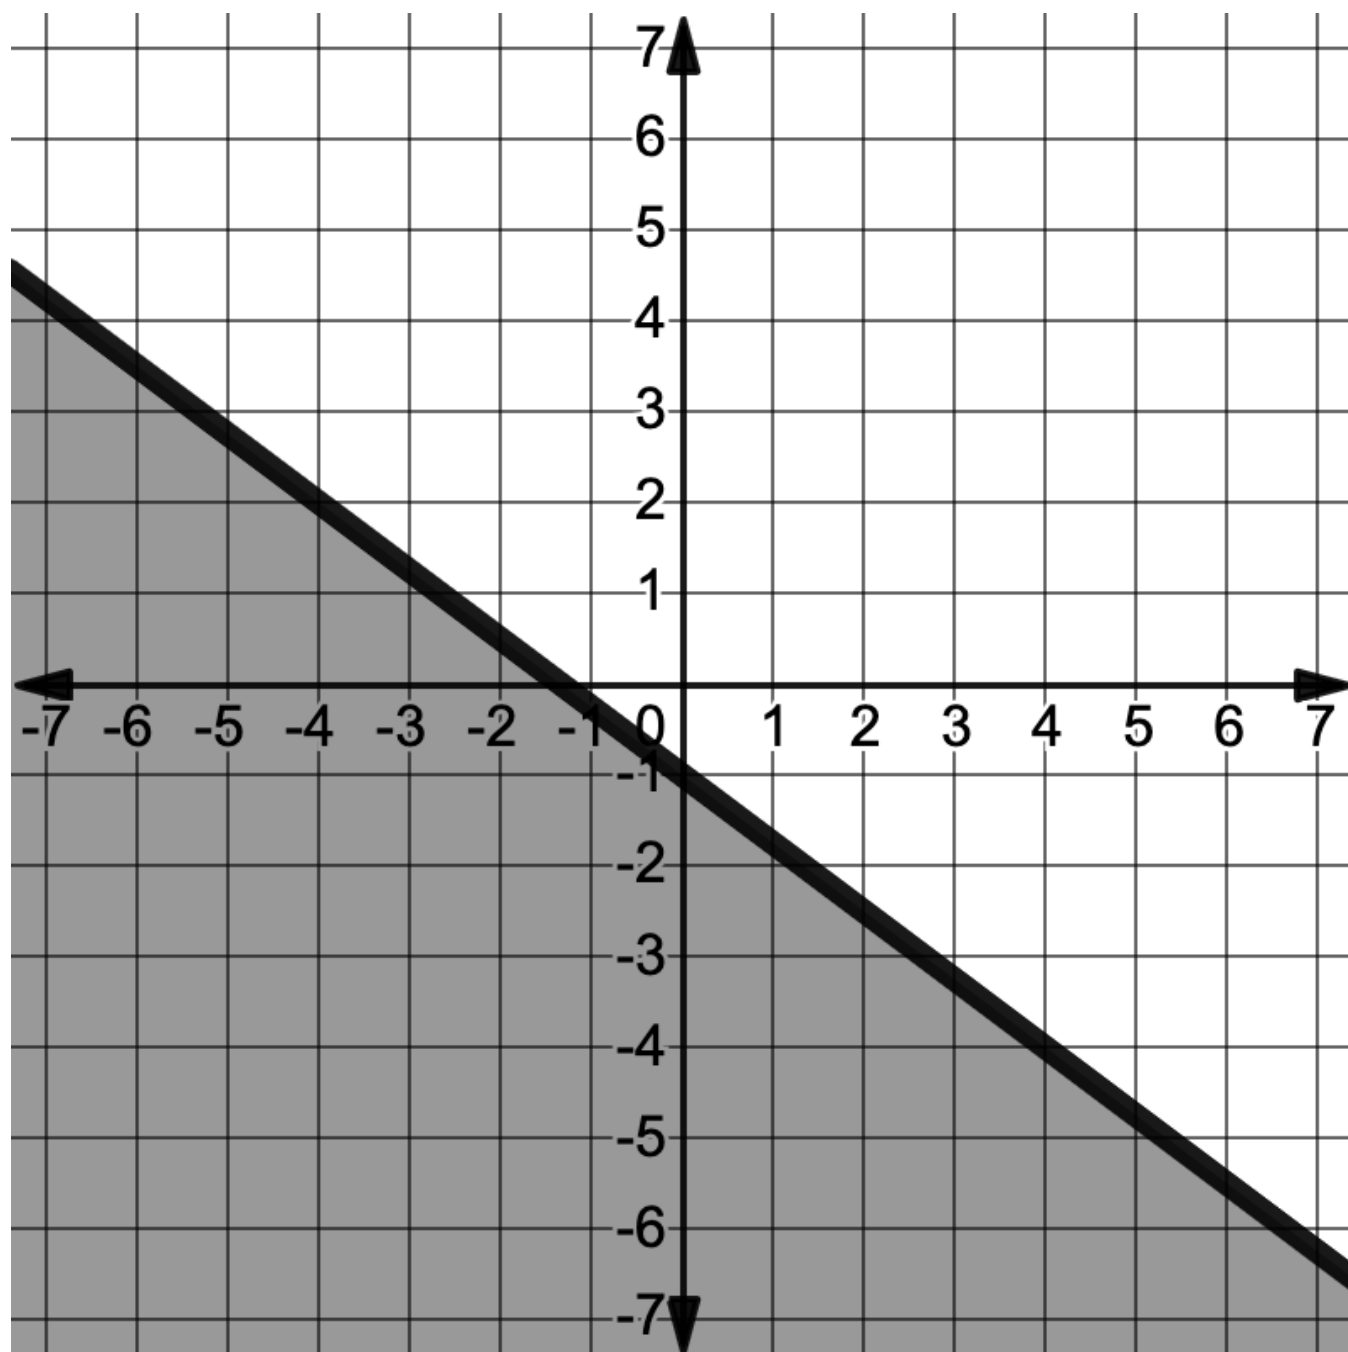

Poster W

***Inequality From
Previous Poster:***

$$y - 2 > -\frac{1}{3}(x - 1)$$

Write an inequality in **slope-intercept form** with the solution set shown.

Poster L

***Inequality From
Previous Poster:***

$$y \leq 3x - 4$$

Write an inequality in **standard form** with the solution set shown.
