

Algebra 1: Unit 6, Lesson 9

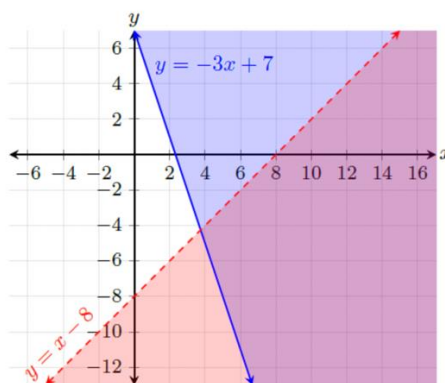

1. Write the inequality that corresponds with the graph?

2. Two inequalities and their graphs are shown.

$$y \geq -3x + 7$$

$$y < x - 8$$

Determine whether the point $(4, -2)$ is a solution for both inequalities.

3. Two inequalities are shown.

$$y > x + 2$$

$$y \geq 2x + 5$$

Determine if the point $(-4, -1)$ is a solution for both inequalities.
