

Algebra 1: Unit 7, Lesson 1

1. An expression is shown:

$$11a^4b^5 + 66a^3b^6$$

Morris began to write an equivalent expression: _____ $(a + 6b)$

Write the expression that correctly completes the expression.

2. Determine whether $4x^3$ is a common factor of $20x^3$ and $36x^2$?

3. An expression is shown.

$$10yz + 20y^2z + 35yz^2$$

What is the greatest common monomial factor?
