

Algebra 1: Unit 7, Lesson 2

1. What is the trinomial represented by the diagram below?

2. Find the product of $(x - 5)(x + 7)$. Write the product in standard form.

3. A table representing the trinomial $n^2 - 24n + 44$ is shown.

	n	-22
n	n^2	$-22n$
-2	$-2n$	44

The factors of the trinomial are $(n - 22)$ and _____.
