

Algebra 1: Unit 7, Lesson 3

1. The area model for $x^2 - 7x + 12$ is shown. Complete the table.

	x	-3
x	x^2	$-3x$
-4		12

2. Find g and h when $g < h$, $g \cdot h = -21$, and $g + h = 4$.

3. An expression is shown.

$$16x^6 - 8x^4$$

Write the equivalent expression using the greatest common monomial factor.
