

Algebra 1: Unit 7, Lesson 7

1. The quadratic expression $36d^2 + 84d + 49$ is a perfect square trinomial. When it is rewritten in the form $a^2 + 2ab + b^2$, what are a and b ?

2. A list of terms is given.

27, 72, 81, 98

Which term is a perfect square?

3. A list of terms is given.

$16n$, $36n$, $36n^2$, $36mn^2$

Which term is a perfect square?
