

Algebra 1: Unit 9, Lesson 9

1. Determine the values of a , b , and c that should be used to solve the equation $7x^2 + 14x - 6 = -x^2 + x - 11$ using the quadratic formula.

2. Andrea solved the equation $x^2 - x - 1 = 0$ using the quadratic formula. Her incomplete solution is shown.

$$x = \frac{1 \pm \sqrt{??}}{2}$$

What is the missing value under the square root?

3. Amaya is solving an equation using the quadratic formula. Her incomplete work is shown.

$$x = \frac{-8 \pm \sqrt{64 - 4(1)(-2)}}{2}$$

$$x = \frac{-8 \pm \sqrt{72}}{2}$$

$$x = \frac{-8 \pm 6\sqrt{2}}{2}$$

Complete the last step of her work.
