

Unit 10: Worked Examples

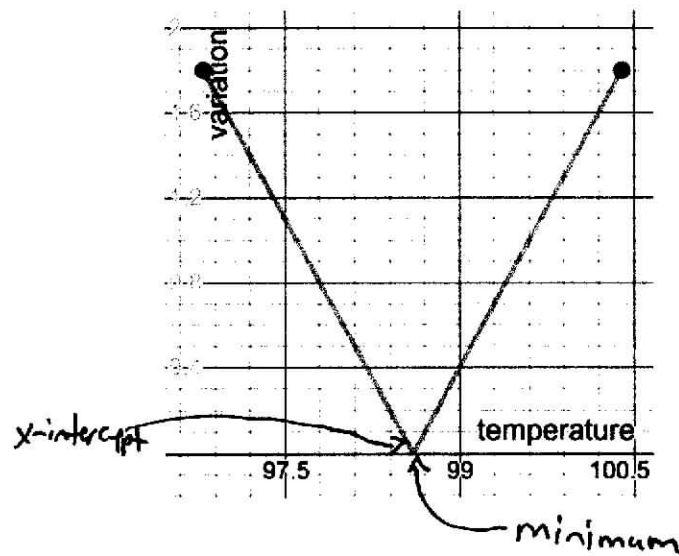

Solve.

$$\begin{array}{r} 1. \quad |y - 7| - 4 = 3 \\ \quad \quad +4 \quad +4 \\ \hline |y - 7| = 7 \end{array}$$

$$\begin{array}{r} y - 7 = 7 \\ +7 \quad +7 \\ \hline y = 14 \end{array}$$

$$\begin{array}{r} y - 7 = -7 \\ +7 \quad +7 \\ \hline y = 0 \end{array}$$

2. Determine the x -intercept(s) and minimum/maximum or the absolute value graph shown.

3. The mass of a regulation baseball should be 145.5 grams (g). The manufacturing tolerance is within 3.5g. Determine the minimum and maximum mass of a regulation baseball.

$$\begin{array}{ccccccc} |x - 145.5| \leq 3.5 \\ \uparrow \quad \quad \uparrow \quad \quad \uparrow \\ \text{actual} & & \text{regulation} & & \text{tolerance} \\ \text{mass} & & \text{mass} & & \end{array}$$
