

Algebra 1
Unit 10
Lesson 1 Practice

Name _____
Date _____
Period _____

1. Complete the table of values for $f(x) = |x - 1| - 3$.

x	-2	-1	0	1	2	3	4
$f(x)$							

2. Use the table of values to graph $f(x) = |x - 1| - 3$ on the coordinate grid.

3. What is the vertex of $f(x) = |x - 1| - 3$?
4. What is the equation for the axis of symmetry of $f(x) = |x - 1| - 3$?
5. What are the x and y -intercept(s) of $f(x) = |x - 1| - 3$?
6. What are the domain and range of $f(x) = |x - 1| - 3$?

7. Identify the intervals on which the function $f(x) = |x - 1| - 3$ is increasing and/or decreasing.

8. Identify the intervals on which the function $f(x) = |x - 1| - 3$ is positive and negative.

For questions 9-10, consider the absolute value function $f(x) = |x + 1| - 4$.

9. Complete the table of values for $f(x) = |x + 1| - 4$.

x	-4	-3	-2	-1	0	1	2
$f(x)$							

10. Use the table of values to graph $f(x) = |x + 1| - 4$ on the coordinate grid.
