

Algebra 1: Unit 11, Lesson 1

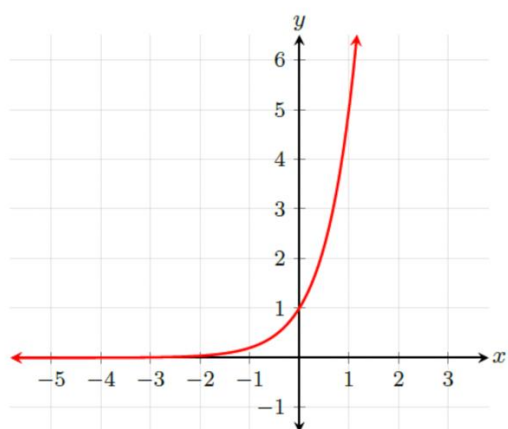

1. A table of values is shown.

x	y
0	10.125
1	6.75
2	4.5
3	3
4	2

Does this table demonstrate exponential growth or decay?

2. In an exponential decay function, as the x -values increase, what happens to the y -values?

3. A function is graphed on the coordinate plane.

In the equation $y = a(b)^x$, is the b value less than 1 or greater than 1?
