

Algebra 1: Unit 11, Lesson 2

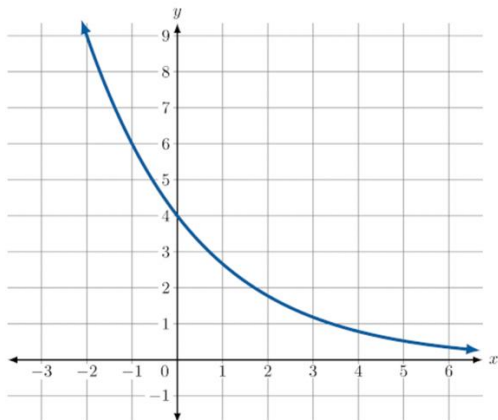

1. A table of values and graph are shown.

x	y
-5	24.594
-4	19.128
-3	14.878
-2	11.571
-1	9
0	7
1	5.444
2	4.235
3	3.294
4	2.562

As the x -value _____, the y -value approaches zero.

2. The graph of $y = 4\left(\frac{2}{3}\right)^x$ is shown on the coordinate plane.

The equation $y = 4\left(\frac{2}{3}\right)^x$ demonstrated exponential decay because the value of b is _____ than 1.

3. What is the range of the equation $y = -\left(\frac{1}{5}\right)^x$?
