

Algebra 1: Unit 12, Lesson 2

1. Data can be classified as categorical or numerical and univariate (one variable) or bivariate (two variables).

Your favorite method of exercise (walking, running, lifting weights, or swimming).

How can this data be classified?

2. Apple's revenue from iPod sales, in millions of dollars, from 2002 to 2014 is shown in the table.

Year	Revenue From iPod Sales
2002	0.4
2003	0.9
2004	4.4
2005	22.5
2006	39.4
2007	51.6
2008	54.8
2009	54.1
2010	50.3
2011	42.6
2012	35.2
2013	26.4
2014	14.4

Classify the data in the table as categorical or numerical and univariate (one variable) or bivariate (two variables).

3. The price per gallon of gas, in dollars, in January of each year from 1994 to 2014 is shown in the table.

Year	Price Per Gallon
1994	0.998
1995	1.130
1996	1.137
1997	1.283
1998	1.132
1999	0.980
2000	1.329
2001	1.487
2002	1.148
2003	1.500
2004	1.614
2005	1.875
2006	2.360
2007	2.289
2008	3.095
2009	1.840
2010	2.769
2011	3.148
2012	3.440
2013	3.391
2014	3.392

A large amount of data is displayed in the table. What type of graph would be helpful to display the data, a line plot or a scatterplot?
