

Algebra 1: Unit 13, Lesson 5

1. The graphs of $y = x^2$ and $y = (x - 6)^2$ are shown.

What is the shift from $y = x^2$ to $y = (x - 6)^2$?

2. A table of values for functions, $f(x) = x^3$ and $g(x) = (x + 3)^3$, is shown.

$f(x) = x^3$		$g(x) = (x + 3)^3$	
x	$f(x)$	x	$g(x)$
-5	-125		-125
-4	-64		-64
2	8		8
3	27		27
4	64	1	64

What is the missing x -value for the coordinate point when $g(x) = 27$?

(_____, 27)

3. A table of values is shown for $y = |x|$ and $y = |x + 4|$.

Complete the table of values for $y = |x + 4|$.

$y = x $		$y = x + 4 $	
x	y	x	y
-4	4	-8	4
-2	2	-6	2
0	0	-4	0
1	1	_____	1
3	3	-1	3
