

Algebra 1: Unit 13, Lesson 6

1. The graphs of $y = x^3$ and $y = x^3 + 2$ are shown on the coordinate grid.

What is the shift from $y = x^3$ to $y = x^3 + 2$?

2. Write a function that describes a horizontal shift 3 units left of $f(x)$.

3. A table of values for functions, $f(x) = x^2$ and $g(x) = x^2 - 3$, is shown.

$f(x) = x^2$		$g(x) = x^2 - 3$	
x	$f(x)$	x	$g(x)$
-2	4	-2	
-1	1	-1	-2
0	0	0	
3	9	3	
6	36	6	

What is the missing y -value for the coordinate point of $g(3)$?
