

1. A survey asked 775 adults the question “Do you like it or dislike it when strangers start conversations with you?”.
- 48% participants identified as male.
 - 35% participants who identified as male stated that they like it when strangers start conversations.
 - 42% participants who identified as female stated that they like it when strangers start conversations.

Use the information to complete the two-way frequency table.

**Do you like it or dislike it when
strangers start conversations with you?**

	Like It	Dislike It	Total
Male			
Female			
Total			

2. Skye is a biologist who conducted a study on the abundance of birds on cacao farms in Costa Rica compared to the abundance of birds in a nearby rainforest. Skye used a segmented bar graph, as shown, to display the data for two different species of birds.

- a. Use the segmented bar graph to complete the two-way relative frequency table.

	Flycatcher	Hummingbird	Total
Cacao Farm			
Rainforest			
Total			

- b. Interpret the joint relative frequency for Flycatchers found on a Cacao Farm.
- c. Interpret the marginal relative frequency for birds found in the rainforest.

3. Students in each class at Leesburg High School were asked whether they have to do chores at home and whether they receive an allowance. Two-way frequency tables that show some of the results of the survey are shown.
- a. Complete each two-way frequency table.

Freshmen				Sophomores			
	Do Get An Allowance	Do Not Get An Allowance	Total		Do Get An Allowance	Do Not Get An Allowance	Total
Do Chores	96			Do Chores		62	193
Do Not Do Chores			181	Do Not Do Chores		58	76
Total		146	302	Total			

Juniors				Seniors			
	Do Get An Allowance	Do Not Get An Allowance	Total		Do Get An Allowance	Do Not Get An Allowance	Total
Do Chores	101			Do Chores		84	189
Do Not Do Chores		23		Do Not Do Chores	21		63
Total	172		267	Total			

- b. Determine the row conditional relative frequency for Sophomores who get an allowance and who do not do chores.
- c. Determine the column conditional relative frequency for Freshman who do not get an allowance and who do not do chores.

4. A survey found that of 2,000 high school seniors surveyed 1,800 have their driver's license. Of those who have their driver's license, 1,350 have a job. Of the seniors who do not have a driver's license, 40 have a job.

a. Complete a two-way relative frequency table.

	Has a Job	Does Not Have a Job	Total
Has Driver's License			90%
Does Not Have a Driver's License			10%
Total		30.5%	100%

- b. Explain how the information in the table can be used to show that there is an association between having a job and having a driver's license.
