

Algebra 1: Unit 14, Lesson 3

1. Armani collected data about the types of ice cream cones and flavors of ice cream she sold at her shop on a hot summer day. The data is summarized in the table and segmented bar graph shown.

	Vanilla	Chocolate	Strawberry	Total
Sugar Cone	8	9	4	21
Waffle Cone	5	6	7	18
Total	13	15	11	39

What is the marginal frequency for strawberry ice cream?

2. Michelle has friends in 9th grade, 10th grade, and 11th grade. She decided to make a survey about each friend's favorite animal. The summary of Michelle's findings are shown in the two-way table and the segmented bar graph.

	9 th grade	10 th grade	11 th grade	Total
Cat	8	7	6	21
Dog	4	5	2	11
Snake	7	3	1	11
Bird	6	5	5	16
Total	25	20	14	59

How many friends like birds?

3. Gina tracked the packages delivered to her home over the past two months. The data collected is summarized in the table and segmented bar graph shown.

	FedEx	UPS	US Postal Service	Total
October	5	2	3	10
November	4	2	4	10
Total	9	4	7	20

How can the marginal frequency be found for October?
