Unit 1
Lesson 12 Practice

Name _____
Date _____
Period _____

$\angle MHB$ is shown.

1. Fold the paper so that $\overrightarrow{HM}$ and $\overrightarrow{HB}$ lie on each other.

2. Use the fold to draw $\overrightarrow{HW}$.

3. Complete the statement.

$\overrightarrow{HW}$ _____ angle _____ so that $\angle$ _____ $\cong$ $\angle$ _____.

Line segment DH bisects $\angle RWC$ such that $m\angle RWH = (7k + 16.3)^\circ$ and $m\angle CWH = (13k - 2.9)^\circ$.

4. Determine the value of k .

5. Determine $m\angle RWH$.

6. Determine $m\angle CWD$.

Line HR bisects $\angle XBN$ and $\angle KBW$ such that $m\angle XBR = (2x + 7.5)^\circ$, $m\angle KBH = (3y - 7)^\circ$, $m\angle WBH = (7y - 91)^\circ$, and $m\angle XBN = (5x - 1)^\circ$.

7. Determine the value of x .

8. Determine the value of y .

9. Determine $m\angle RBN$.

10. Determine $m\angle KBW$.
