

Geometry: Unit 8, Lesson 6

1. Rectangle $ZLGB$ is shown where diagonals $\overline{ZG}$ and $\overline{LB}$ intersect at point X . $\overline{ZX} = 6.5$, $\overline{ZL} = 10$, and $\overline{ZB} = 6$. What is the length of $\overline{BX}$?

2. Square $NRTY$ where diagonals $\overline{NT}$ and $\overline{RY}$ intersect at point B and $\overline{NT} = 25$ is shown. What is the length of $\overline{RB}$?

3. The neck of a guitar consists of multiple parallelograms. Parallelogram $NGRT$ where $\overline{GR} = (4x + 3)$ cm, $\overline{NG} = (2x + 1)$ cm, and $\overline{RT} = (6x - 3)$ cm is shown. What equation can be used to find the value of x ?
