

Geometry
Unit 9
Lesson 1 Practice

Name____**Answer Key**____
Date_____
Period_____

1. Rectangle $TZDP$ is 9 feet wide and 10.5 feet long. What is the area of Rectangle $TZDP$?

$$9 \times 10.5 = 94.5 \text{ ft}^2$$

2. Triangle RVY is 7.8 inches tall with a base of 6.2 inches. What is the area of Triangle RVY ?

$$\frac{1}{2}(7.8)(6.2) = 24.18 \text{ in}^2$$

Find the area of each figure given the dimensions in the table.

Shape	Dimensions	Area
Circle	$r = 9$	3. $\pi \cdot r^2 = \pi \cdot 9^2$ $= 81\pi$ $\approx 254.34 \text{ units}^2$
Parallelogram	$b = 10.2$ and $h = 4.1$	4. $(10.2)(4.1)$ $= 41.82 \text{ units}^2$
Rhombus	$p = 7.3$ and $q = 7.3$	5. $\frac{(7.3)(7.3)}{2} = 26.645 \text{ units}^2$
Trapezoid	$b_1 = \frac{9}{10}$, $b_2 = 8\frac{5}{6}$, $h = 9$	6. $\frac{1}{2} \cdot 9 \left(\frac{9}{10} + \frac{53}{6} \right) = 43.8 \text{ units}^2$

7. Kite $CMNW$ has one diagonal that is 5.4 inches and a second diagonal that is 10.8 inches. What is the area of Kite $CMNW$?

$$\frac{5.4 \times 10.8}{2} = 29.16 \text{ in}^2$$

Use the given diagram for questions 8-10.

Jerry is designing a boardwalk. His blueprints are shown.

8. What shapes can be used to find the area of the shaded region?

Answers may vary. Possible answers: triangles, rectangles, trapezoids, squares

9. Divide the shaded area into smaller shapes on the graph.

10. What is the area of the shaded region?

95 square units
