

Geometry
Unit 9
Lesson 4 Practice

Name _____
Date _____
Period _____

Use the graph to answer questions 1-5.

1. Draw the transformation of the trapezoid reflected across the y -axis on the graph.
2. Draw the three-dimensional shape that would be created by rotating the trapezoid around the y -axis.
3. What are the base and height measurements of the three-dimensional shape, in units?
4. Draw the transformation of the trapezoid reflected across the x -axis in a different color on the graph.
5. Draw the three-dimensional shape that would be created by rotating the trapezoid around the x -axis.

Use the graph of the given circle to answer questions 6-8.

6. Draw the transformation of the circle reflected across the x -axis.
7. What three-dimensional shape would be created by rotating the circle around the x -axis?
8. Name one real world object that exhibits the three-dimensional shape created?

For questions 9 and 10, draw a two-dimensional figure and an axis of rotation that would result in the real-world object when the two-dimensional figure is rotated around the axis of rotation.

Image	Two-Dimensional Figure
9. A hot air balloon with a radius of 8 meters and a height of 20 meters. 	
10. A clay pot with a radius of 9 inches and a height of 12 inches.
