

G.11.10 Using Nets to Find Surface Area

Cylinder

|                                 |  |  |  |  |
|---------------------------------|--|--|--|--|
| Dimension of the Figure         |  |  |  |  |
| Variable Used for the Dimension |  |  |  |  |
| Formula for the Lateral Area    |  |  |  |  |
| Formula for the Surface Area    |  |  |  |  |

Cube

|                                 |  |  |  |  |
|---------------------------------|--|--|--|--|
| Dimension of the Figure         |  |  |  |  |
| Variable Used for the Dimension |  |  |  |  |
| Formula for the Lateral Area    |  |  |  |  |
| Formula for the Surface Area    |  |  |  |  |

## Rectangular Prism

| Dimension of the Figure         |  |  |  |  |
|---------------------------------|--|--|--|--|
| Variable Used for the Dimension |  |  |  |  |
| Formula for the Lateral Area    |  |  |  |  |
| Formula for the Surface Area    |  |  |  |  |

## Triangular Prism

| Dimension of the Figure         |  |  |  |  |
|---------------------------------|--|--|--|--|
| Variable Used for the Dimension |  |  |  |  |
| Formula for the Lateral Area    |  |  |  |  |
| Formula for the Surface Area    |  |  |  |  |

## Square Pyramid

The height of a triangle that is a face of a pyramid is also known as the pyramid's slant height,  $h_s$ .

| Dimension of the Figure         |  |  |  |  |
|---------------------------------|--|--|--|--|
| Variable Used for the Dimension |  |  |  |  |
| Formula for the Lateral Area    |  |  |  |  |
| Formula for the Surface Area    |  |  |  |  |

Rectangular Pyramid

The height of a triangle that is a face of a pyramid is also known as the pyramid’s slant height,  $h_s$ .

|                                 |  |  |  |  |
|---------------------------------|--|--|--|--|
| Dimension of the Figure         |  |  |  |  |
| Variable Used for the Dimension |  |  |  |  |
| Formula for the Lateral Area    |  |  |  |  |
| Formula for the Surface Area    |  |  |  |  |
