

Geometry: Unit 10, Lesson 2

1. Circle W is shown with point K , R , T , and X on the circle. What central angle has radii that intersect the circle to show $\widehat{TR}$?

2. Circle W is shown with points V , H , Z , K , and T on the circle. An arc on circle W between points Z and V . The intercepted arc of which angles is given?

3. What is a piece of information that is used when determining the circumference of a circle?
