

Grade 6 Accelerated
Unit 5
Lesson 4 Homework

Name _____
Date _____
Period _____

Carrie is starting a dog-walking business. The table represents her first three jobs.

Miles of Walking	One Dog	Two Dogs	Three Dogs
1.5 miles	\$6		
2 miles			\$16
2.5 miles		\$15	

1. What does Carrie charge per one mile of dog-walking for one dog?
2. What is the unit rate for walking two dogs?
3. When Carrie walks three dogs, what does she charge per mile?
4. How much does the unit rate increase for each additional dog?
5. Carrie wants to purchase a pair of running shoes for \$75. She will need to walk _____ miles for the family with two dogs to purchase the shoes.
6. A family has hired Carrie to walk their three dogs every Tuesday and Thursday afternoon. If they agree to pay her \$36 every week, Carrie will walk the dogs

o 4

o 4.5

 miles each week.

Carrie has determined she needs a pricing sheet to be more efficient when quoting prices to dog owners.

Miles of Walking	One Dog	Two Dogs	Three Dogs
1 mile			
1.5 miles	\$6		
2 miles			\$16
2.5 miles		\$15	
3 miles			

7. Fill in the table by using the unit rates you determined previously.

Carrie has taken a partner to expand the dog-walking business. They have combined all money earned for one week to pay for business cards.

8. Carrie walked three dogs 4.5 miles, two dogs 3 miles, and one dog 5 miles during

the week. Carrie earned

- ☐ \$69
- ☐ \$74

to put towards business cards.

9. Her partner walked one dog 2.5 miles, two dogs 4 miles, and walked three dogs 2

miles. Carrie's partner earned

- ☐ \$50
- ☐ \$46

to put towards business cards.

10. Carrie will have enough money to purchase

- ☐ 500 glossy business cards for \$110.
- ☐ 1000 glossy business cards for \$150.
