

Triangles THX , YBR , and DKM are shown on the circular grid.

Draw each of the angles on the grid.

1. $\angle XWY$

4. $\angle BWD$

2. $\angle KWR$

5. $\angle BWH$

3. $\angle DWH$

6. $\angle MWX$

7. Select all of the angles drawn on the grid whose measure is 90° .

- ☐ $\angle XWY$
- ☐ $\angle KWR$
- ☐ $\angle DWH$
- ☐ $\angle BWD$
- ☐ $\angle BWH$
- ☐ $\angle MWX$

8. Select all of the angles drawn on the grid whose measure is 180° .

- ☐ $\angle XWY$
- ☐ $\angle KWR$
- ☐ $\angle DWH$
- ☐ $\angle BWD$
- ☐ $\angle BWH$
- ☐ $\angle MWX$

Complete the statements.

9. $\triangle THX$ is created by rotating

- ☐ $\triangle KDM$
- ☐ $\triangle RBY$

 180° clockwise about point W .

10. $\triangle RBY$ is created by rotating

- ☐ $\triangle KDM$
- ☐ $\triangle THX$

 90° clockwise about point W .
