

Geometry: Unit 1, Lesson 9

1. Three angles are shown: $\angle DRF$, $\angle DRH$, and $\angle FRH$. If $m\angle DRF = 172^\circ$ and $m\angle DRH = 49^\circ$, what is the measure of $\angle FRH$?

2. Two angles are shown. What is the value of x ?

3. What geometric tools are used when copying an angle?
