

Geometry
Unit 1
Lesson 10 Practice

Name _____
Date _____
Period _____

$\overline{WT}$, $\overline{CM}$, $\overline{XK}$, $\overline{LG}$, and $\overline{LP}$ are shown.

Use patty paper or fold this paper to determine each.

1. Which line or segment, if any, bisects $\overline{CM}$.

2. Which line or segment, if any, bisects $\overline{WT}$.

3. Which line or segment, if any, bisects $\overline{RD}$.

4. Which line or segment, if any, bisects $\overline{RT}$.

5. Complete the statement.

_____ is a perpendicular bisector of _____.

$\overrightarrow{TM}$ bisects $\overline{HW}$ at point T .

6. Draw a diagram of the description.

7. Determine the value of k if $HT = 5k + 12$ and $TW = 10k - 23$.

8. What is the length of $\overline{HW}$?

$\overline{KM}$ is a perpendicular bisector of $\overline{RY}$ where point W is the midpoint.

9. Draw a diagram of the description.

10. Determine the value of x if $RY = 11x + 46$ and $RW = 3x + 58$.
