

Geometry: Unit 1, Lesson 11

1. In the figure shown, $\overline{VZ}$ is the perpendicular bisector of $\overline{WY}$, where $WZ = 8$, $YZ = 8$, and $VY = 12$. What is the length of $\overline{VW}$?

2. Is the image shown a perpendicular bisector?

3. What contains at least two equal length sides and two equal interior angle measures?
