Geometry: Unit 2, Lesson 2

1. After school today, Ryland finds that the ground outside of the school is wet. Ryland concludes it rained during class today. This situation is an example of what?

2. The grass is wet. Stanley states it must have rained today. Give an example of a counterexample?

3. Fellow classmate, Coleman, states that all students love geometry, but offers no rationale for his statement. This is an example of what?
