

Geometry: Unit 3, Lesson 1

1. $\overline{KM}$, $\overline{NR}$, and $\overline{PL}$ are shown, where $\overline{NR} \perp \overline{KM}$. What describes the relationship between $\angle LMR$ and $\angle RMP$?

2. Given $m\angle QAZ = 79^\circ$, what is the measure of an angle supplementary to $\angle QAZ$?

3. Are the given two angles complementary?

$$m\angle IJK = 89^\circ \text{ and } m\angle JKL = 89^\circ$$
