

Geometry: Unit 3, Lesson 2

1. $\angle NSH$ and $\angle KSW$ are vertical angles and the $m\angle NSH = 139^\circ$. What is an equation that could be used to find the value of $m\angle KSW$?

2. Lines WM , WP , ML , DH , and LH are shown. What line is a transversal of lines WM and LH ?

3. Lines FH and WG intersecting at point K are shown. What is an angle pair that has equal measures?
