Unit 3  
Lesson 3 Practice

Name Answer Key  
Date \_\_\_\_\_  
Period \_\_\_\_\_

Lines  $\overline{XW}$ ,  $\overline{QR}$ , and  $\overline{TC}$  are shown.

$\overline{XW} \parallel \overline{QR}$ ,  $m\angle CVW = 27^\circ$

Complete the table.

| Angle        | Angle Measure | Relationship with $\angle CVW$ |
|--------------|---------------|--------------------------------|
| $\angle XVZ$ | 1. $27^\circ$ | 2. Vertical angles             |
| $\angle VZR$ | 3. $27^\circ$ | 4. Corresponding angles        |
| $\angle QZT$ | 5. $27^\circ$ | 6. Alternate exterior angles   |

$\angle CVW$  and  $\angle CVX$  are supplementary, so  $m\angle CVX = 153^\circ$ .

Complete the table.

| Angle        | Angle Measure  | Relationship with $\angle CVX$ |
|--------------|----------------|--------------------------------|
| $\angle ZVW$ | 7. $153^\circ$ | 8. Vertical angles             |
| $\angle TZR$ | 9. $153^\circ$ | 10. Alternate exterior angles  |
