

Geometry: Unit 3, Lesson 3

1. Lines XP , MB , FR , and WK are shown. $\overleftrightarrow{WK} \parallel \overleftrightarrow{FR}$ with $\overleftrightarrow{MB}$ and $\overleftrightarrow{XP}$ as transversals. $m\angle WYS = 127^\circ$ and $m\angle KTS = 133^\circ$. What is the measure of $m\angle MYT$?

2. Lines FG , KP , and RH are shown. $\overleftrightarrow{FG} \parallel \overleftrightarrow{RH}$ and $\overleftrightarrow{KP}$ is a transversal. What is the relationship between $\angle KBF$ and $\angle BTR$?

3. Lines VK , PW , and GM are shown. $\overleftrightarrow{VK} \parallel \overleftrightarrow{PW}$ and $\overleftrightarrow{GM}$ is a transversal. What is an example of a pair of corresponding angles?
