

## Geometry: Unit 3, Lesson 7

1. Lines  $TV$ ,  $KN$ , and  $DG$  are shown.  $\overleftrightarrow{TV} \parallel \overleftrightarrow{KN}$  with transversal  $\overleftrightarrow{DG}$ .  $m\angle DMT = (13y + 6)^\circ$ ,  $m\angle TMH = 70^\circ$ , and  $m\angle KHM = (15y - 10)^\circ$ . What is an equation that can be used to find the value of  $y$ ?

2. Lines  $YP$ ,  $RW$ , and  $BZ$  are shown, where  $\overleftrightarrow{YP} \parallel \overleftrightarrow{RW}$  and  $\overleftrightarrow{BZ}$  is the transversal.  $m\angle BKP = (18m - 2)^\circ$  and  $m\angle WSZ = (22m - 38)^\circ$ . What type of angles are  $\angle BKP$  and  $\angle WSZ$ ?

3. Given the equation  $9t - 12.75 = 8.5t + 4$ , what is the value of  $t$ ?
