

## Geometry: Unit 4, Lesson 2

1. What point will the image of vertex  $B$ , on quadrilateral  $ABCD$ , be located at after a reflection over the  $y = -x$  line?

2. After reflecting quadrilateral  $FHLR$  over the  $y = x$  line, where will the new point  $F$  be located at?

3. Triangles  $YBH$ ,  $DWF$ ,  $RMT$  and  $XKZ$  are shown on the coordinate grid. To transform  $\triangle YBH$  into  $\triangle RMT$ , what must you do to  $\triangle YBH$ ?
