

Geometry: Unit 5, Lesson 4

1. $\triangle XYZ$ and $\triangle KMR$ are shown where $\triangle XYZ \cong \triangle KMR$. What angle is congruent to $\angle YZX$?

2. $\triangle LHF$ and $\triangle XRP$ are shown where $\triangle LHF \cong \triangle XRP$. What line segment is congruent to $\overline{HF}$?

3. Two congruent triangles are shown where $\triangle GHS \cong \triangle VDT$. Complete the following statement:

$\angle SHG \cong$ _____
