

Geometry: Unit 5, Lesson 5

1. Quadrilateral $PXRS$ is shown where $\angle XYR \cong \angle SYR$, $\angle XPR \cong \angle SPR$, and $\overline{PX} \cong \overline{PS}$. Does the quadrilateral described match the given image?

2. Polygon $SFTR$, where $\overline{SF} \cong \overline{SR}$ and $\angle RST \cong \angle FST$, is shown. With the given information, it can be concluded that $\triangle TRS \cong \triangle TFS$ because both triangles share what?

3. Claire marked the diagram based on the given information, as shown. Given: $\angle BWR \cong \angle FYH$, $\overline{BW} \cong \overline{FY}$, $\overline{RW} \cong \overline{HY}$, what did Claire incorrectly mark?
