Unit 5

Lesson 7 Homework

Name _____

Date _____

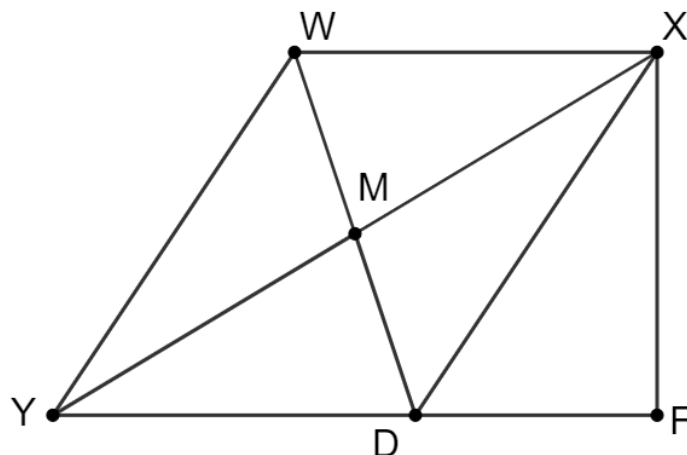

Period _____

Quadrilateral $WXYF$ is shown where M is the midpoint of $\overline{WD}$ and $\overline{WX} \parallel \overline{YF}$.

Given: M is the midpoint of $\overline{WD}$, $\overline{WX} \parallel \overline{YF}$.

Prove: $\overline{WX} \cong \overline{YD}$

Use the given information to answer the questions about the incomplete proof that is shown. Each empty box has the corresponding question number.

M is the midpoint of $\overline{WD}$

Given

Question 1

Question 2

$\overline{WX} \parallel \overline{YF}$

Given

Question 3

Question 4

Question 5

Question 6

Question 7

Question 8

Question 9

Question 10

1. What is the statement that belongs in the box?
2. What is the reason for the statement?
3. What is the statement that belongs in the box?
4. What is the reason for the statement?
5. What is the statement that belongs in the box?
6. What is the reason for the statement?
7. What is the statement that belongs in the box?
8. What is the reason for the statement?
9. What is the statement that belongs in the box?
10. What is the reason for the statement?
